

# Website Creation Process

By Shihab Sarkar

# Let's Begin: Share These Details

To begin creating your website, we will need the following information:

1. WordPress login details or hosting account credentials.
2. Your company logo. (If you want, I will create a professional logo for your business)
3. Website content. ( **Note:** If you don't have full content ready, no worries — I can write it for you. Just share details about your services.)

# Working Process

Platform: WordPress

◆  
**01**

I will first design the Header, Footer & Home Page of your website according to your brand & content.

◆  
**02**

Once you approve the initial design, I will proceed with the remaining pages

◆  
**03**

If any minor changes are needed after the site is completed, I will do them free of charge.

# Key Features

- Modern, clean, and professional layouts
- User-friendly design and structure
- Fully responsive across mobile, tablet, and desktop
- Speed-optimized for faster loading times
- Google reCAPTCHA integration to protect contact forms from spam
- Google Analytics set up to track and analyze visitor data
- Secure and scalable for future growth
- Full support until you are 100% satisfied

**Thank you  
very much!**

Feel free to let me know if you have any questions
